

Bristol Architecture Walk

With the support of Bristol's Architecture Centre, the Core Group conducted a walking tour of important buildings in the centre of the City. Buildings we looked included the Docks, the Lloyds TSB building, St Mary Redcliffe Church, Queens Square, the Watershed and Millennium Square. The Core Group filled out a questionnaire and took photographs of interesting buildings whilst Tanya produced a short video.

"The object of the visit was to look at some of the architectural gems in Bristol. This was a good starting point for the wider work of Archimedia and got me thinking about some of the ways our building could be designed" *David*
